DOL/ETA/OWS
Revised 08/26/13

Based on actual data through 6/30/2013

1. Projected rates are based on economic conditions specified by the USDOL.
2. FUTA Reduction Amounts have been adjusted to more closely reflect actual receipts expected to be received.
3. The Average High Cost Multiple (AHCM) is defined as the ratio of the 'Trust Fund as a Percent of Total Wages' (Reserve Ratio) to the Average High Cost Rate (AHCR).
The USDOL provided Average High Cost Rate is the average of the three highest benefit cost rates in the last twenty years (or a period including three recessions, if longer).
Benefit cost rates are benefits paid (including the state's share of extended benefits but excluding reimbursable benefits) as a percent of total wages in taxable employment.
4. A voluntary payment of \$220 million was made in May 2013. Remaining loans are repaid via FUTA Credit Reductions and voluntary payments.
